PROFILE SUMMARY

Data engineer with 4+ years of experience building enterprise data platforms across energy-trading systems and pharmaceutical analytics. At Uniper, deliver Snowflake, dbt and Azure engineering for North America ETRM operations, including the CXL-to-Endur migration and pipelines ingesting 500M+ source rows daily. Known for taking ownership of ambiguous systems, improving reliability and performance, and translating business requirements into production data workflows. SnowPro Associate: Platform certified, with project experience in retrieval-augmented generation and agentic workflows.

TECHNICAL SKILLS

Production data engineering: Snowflake, dbt, Snowpipe, Azure Data Factory, Azure Function Apps, Azure DevOps, Python, SQL, C#, CI/CD, ETL/ELT pipelines, job orchestration, data quality and monitoring

Analytics and platforms: Dataiku DSS, Tableau, Excel, Git, Jira

Applied GenAI project experience: RAG, AI agents, agentic workflows, LangChain, CrewAI and Ollama

EXPERIENCE

Senior Technical Consultant, UGCNA Data Strategy | *Uniper India GCC, Noida, Uttar Pradesh*

June 2025 - Present

- Deliver data engineering for Uniper's North America ETRM operations while developing deeper knowledge of energy-trading data and business workflows.
- Assumed engineering ownership of an unfamiliar codebase during the implementation-vendor transition, completed the Endur go-live, stabilised the supporting data platform and helped onboard the wider team.
- Designed and delivered the end-to-end flow from source ingestion through business-ready reporting, ingesting 500M+ source rows daily.
- Reduced Endur report latency from approximately five minutes to under ten seconds using incremental dbt logic for deduplication, re-ranking and clustering.
- Reduced daily file-transfer time from approximately 120 minutes to two minutes by parallelising batch transfers across Azure VNets.
- Converted local scripts into monitored production Azure Functions with logging, error handling and end-to-end refresh orchestration; also reduced ADF job runtime by approximately 30%.
- Integrated Morningstar, AESO, Genscape and ARGUS feeds; serve as project Scrum Master and mentor a direct report as the India-based team grows.

Business Technology Solution Associate | *ZS Associates, Gurugram, Haryana*

December 2022 - May 2025

- Partnered with a major US pharmaceutical client to deliver a go-to-market reporting platform covering 300+ KPIs.
- Supported ETL across more than one billion healthcare records using Snowflake and Dataiku DSS, improving processing time by 25%.
- Built a Python framework using Tableau REST APIs and XML manipulation that reduced manual reporting effort by 60%.
- Performed recurring QA and data reconciliation, resolved issues through Jira, and translated stakeholder requirements into automated reporting and ETL workflows.

Business Technology Solution Associate Intern | *ZS Associates, Gurugram, Haryana*

June 2022 - December 2022

- Streamlined MLOps workflows across three brands, improving scalability and operational efficiency by approximately 20% while enabling repeatable model updates.
- Implemented CI/CD and data orchestration, monitored data and model drift, and centralised configuration and data versioning for stronger traceability.

CERTIFICATION

SnowPro Associate: Platform | Snowflake | Issued May 2026

EDUCATION

Gen AI Engineer Apprenticeship | 100x Engineers | May 2024 - November 2024

Bachelor of Technology in Computer Science | Guru Gobind Singh Indraprastha University, Delhi | August 2018 - April 2022
