## PROFILE SUMMARY

AI-enabled data engineer with 5+ years of experience spanning pharma analytics and energy trading (ETRM). Currently leading the data architecture for Uniper's North America ETRM operations, having driven the migration from CXL to Endur, architecting pipelines that process 500M+ records daily. Combines hands-on Snowflake/DBT/Azure engineering with applied Gen AI experience (RAG, agentic workflows) and AI-assisted development practices. Certified SnowPro Associate; first India-based hire building out the team's practice as it scales.

## EXPERIENCE

**Senior Data Engineer** | *Uniper (India GCC), Noida, Uttar Pradesh*

*June 2025 – Present*

- As the outgoing implementation vendor (Wipro) transitioned out, reverse-engineered the codebase solo and took Endur live independently with zero external support, then onboarded the rest of the team onto it.
- Architected the end-to-end ETRM data migration from CXL to Endur, building the full data flow from source ingestion through business-ready reporting for 500M+ records processed daily.
- Built incremental load logic in DBT that cut Endur report latency from ~5 minutes to under 10 seconds, handling deduplication, re-ranking, and clustering keys.
- Converted old local, undeployed scripts into production Azure Functions — including new Azure infra that refreshes Endur data end-to-end, with monitoring, logging, and error handling built in.
- Reduced daily file sync time from ~120 minutes to ~2 minutes by parallelizing batch transfers on Azure VNets.
- Optimized dynamic table refresh orchestration in ADF, cutting job runtime by ~30%.
- Serve as the project's Scrum Master, designing sprints and structuring the team's task planning.
- First India-based hire for the UGCNA team; mentor a direct report as the India practice scales.
- Integrated external market data providers, including Morningstar, AESO, Genscape, and ARGUS.
- Adopted AI-assisted development practices (GitHub Copilot, Claude Code) to accelerate pipeline delivery without compromising reliability.

**Business Technology Solution Associate** | *ZS Associates, Gurugram, Haryana*

*Dec 2022 – May 2025*

- Collaborated with the largest US pharma company to develop a Go-to-Market report by leveraging advanced analytics to evaluate 300+ KPIs.
- Oversaw ETL processes for 1 billion+ healthcare data records using Snowflake and Dataiku DSS, optimizing data ingestion and reducing processing time by 25%.
- Conducted weekly QA/QC checks and resolved data issues via Jira, maintaining high data accuracy.
- Translated client requirements into automated reporting dashboards and ETL workflows.

**Business Technology Solution Associate Intern** | *ZS Associates, Gurugram, Haryana*

*June 2022 – Dec 2022*

- Streamlined ML workflows for 3 brands using MLOps, improving scalability and operational efficiency by almost 20% while facilitating seamless model updates and integrations across platforms.
- Implemented advanced CI/CD and data orchestration solutions, enhancing deployment speed and reliability.
- Mitigated data and model drift, maintaining consistent performance and accuracy over time.
- Centralized configuration management and implemented data versioning, boosting traceability and team collaboration.

## TECHNICAL SKILLS

Snowflake, DBT, Azure Function Apps, Azure Data Factory (ADF), Azure DevOps, Git, CI/CD, ETL Pipelines, Data Governance, Job Orchestration and Automation, Python, C#, SQL, Dataiku DSS, Tableau, Excel, Databricks, AI Agents, RAG, Langchain, CrewAI, Ollama, Agentic Workflows

## CERTIFICATIONS

- SnowPro Associate: Platform — Snowflake (Issued May 2026)

## EDUCATION

**Gen AI Engineer** | *100x Engineers – Apprenticeship Cohort*

*May 2024 – Nov 2024*

- Foundation Gen AI: Proficient in model fine-tuning (DreamBooth, Stable Diffusion) and leveraging tools like CivitAI and Llama Adapter; skilled in building and deploying full-stack LLM applications.
- Enterprise AI Solutions: Applied Retrieval-Augmented Generation (RAG) and AI agents to develop enterprise-ready solutions.

**Bachelor of Technology in Computer Science** | *Guru Gobind Singh Indraprastha University, Delhi, India*

*Aug 2018 – Apr 2022*

## WORK IMPACT

**Uniper**

- Recognized for Endur Migration Delivery: Received verbal commendation from senior leadership and US-based stakeholders (Houston team) in leadership reviews for end-to-end ownership and successful go-live of the Endur migration.

**ZS Associates**

- 60% Time Savings through Tableau Automation: Developed a Python-based framework using Tableau REST APIs to automate data extract downloads, dashboard comparison, and sheet visibility adjustments, reducing manual effort by 60%. Enabled XML manipulation and seamless publishing of additional views, all controlled via a centralized config file for enhanced efficiency.
- Subject Matter Expert: Recognized by stakeholders for delivering clear use-case guides, detailed Exploratory Data Analysis (EDA), and actionable insights on new data sources, enhancing understanding and supporting data-driven decision-making.
- Acknowledged for Outstanding Delivery and Business Growth: Frequently acknowledged by Partners and Managers for experience in delivering impact through critical insights and excellent communication.
- Project Champion: Nominated as Project Champion Lead to work with vendors to design guides and training sessions to onboard and speed up projects within ZS Associates.
